

Approved Meeting Minutes August 11, 2021

1. Guests

- a. **Kevin Morley (AWWA)** – Cyber Security – Slides and recording of presentation available to members.
- b. **Meg Parish (CDPHE)** – State updates
 - i. The new Director of the Water Quality Control Division is Nicole Rowan. Her old position as Clean Water Program Director will have someone as an acting announced soon. The posting for the position will also go out soon.
 - ii. Jeremy Neustifter – New Director of Environmental Boards and Commissions.
 - iii. Stakeholder work at the Division: Roadmap meeting next week.
 - iv. Permitting: Working to establish permit webinar subgroups.
 - 1 Implementation of implicit NILs
 - 2 Development of alternatives analysis
 - 3 Question answer comment session around chemical evaluations.
 - 4 Temperature
 - v. October Permits Webinar will be on water quality planning targets. The webinar will include changes to the water quality target scope forms. There will also be limited scope PELs for temperature and chemicals.
 - vi. There have been draft modifications to some permits to include PFAS monitoring. Still looking at comments received.

2. Board Action Items

- a. Approval of invoices for payment – **Approved**
 - i. Vranesh & Raisch: \$1,275
 - ii. Corona: \$2,118.28
- b. Approval of July Minutes - **Approved**

3. Discussion Items

- a. PFAS in permits – CWWUC submitted comments on the permits that had PFAS included.
- b. Update on CWWUC Membership - All but two organizations have paid. Both responded with intent to pay. Some issues with the mail as payment was sent in one case but the check was not received.

- c. Wastewater and water equipment lead times – In some cases VFD and electrical equipment spare parts cannot provide lead times due to issues with production.
- d. Website links and discussion board updates (Chemical availability) – Please start using the website and set-up discussions. Shonnie can assist in getting your login set-up.
- e. Annual meeting will be held in September – Shonnie will prepare an annual report on successes and financials overview. Board nominations will be requested. The election of officers will also take place.
- f. Let Shonnie know if there are any special presentations you would like.
- g. Jeremy Woolf – Greeley was wondering if the CWWUC would be willing to serve as a central data repository for some of the lab results for chemical evaluations, however it sounds like WET testing will be required for each individual effluent. So, now they are hoping to see if the Division would accept WET testing for chemicals if done with lab water or other effluent. CWWUC can put in that request to the Division.
 - i. NDAs are typically required by chemical manufacturers which is why the state has been housing that (Andra).
 - ii. If it turns out that lab water for WET testing is acceptable, it would be useful to find out what the testing design has been for successful testing.
 - iii. GEI possibly could provide a presentation to talk about WET testing and include a conversation with the Division (Blair).
- h. There will only be virtual meetings for the next few months as in-person meetings do not seem to be popular. CWWUC will revisit the in-person option at the first of the new year.
- i. Sufficiently sensitive has been evaluated by Metro. Katie to provide an update on it at the October CWWUC meeting.

Next Meeting: Wednesday, September 8, 2021 at 1:00 pm
